Experience

- Jul 2021 – Current • Rawalpindi

Backend Developer
ContentStudio.io

As a Backend Laravel Developer at ContentStudio.io, I developed and maintained server-side components for our social media management tool, integrating APIs and managing background jobs. My role also included designing and implementing scalable and secure RESTful APIs for seamless data exchange between the server and front-end.

- Oct 2019 – Jul 2021 • Islamabad

Software Engineer
Sabaq Foundation

As a Software Engineer at Sabaq Foundation, I developed and maintained server-side PHP scripts for educational content and portal management. I also created an Android app using React Native to provide students with easy access to educational content.
